**DETAILED ACTION**

***Response to Arguments***

1. Applicant's arguments with respect to claims 1-7, 12, 13, 15-20 have been considered but are moot in view of the new ground(s) of rejection.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-5, 7, 12, 13, 15-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Schmidt et al (5,077,641).
4. Schmidt discloses an adjustable light fixture comprising: a housing with an external surface (1) and an interior compartment (fig 1); a reflector assembly rotatably attached to the housing within the interior compartment of the housing (2); and an adjustment mechanism that is operable from the external surface of the housing (10) to cause movement of the reflector relative to the housing; a channel through the housing connecting the interior compartment of the external surface of the housing, wherein the adjustment mechanism extends through the channel from the interior compartment to the external surface of the housing (fig 1, 10); the adjustment mechanism is attached to the reflector assembly (figs 1-3), the reflector assembly includes a frame and the adjustment mechanism is attached to the frame (fig 2); the attachment of the frame to

the housing comprises a hinge; the reflector assembly includes a reflector configured to be attached to a reflector frame (2), a light socket fixture positioned in the interior compartment of the housing(6).

- With regards to method claims 15-20, the prior art cited recites the structural limitations in the method claims as cited above.

***Allowable Subject Matter***

5. Claims 25-31 are allowed.
6. Claims 8-11 and 21-24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
7. The following is a statement of reasons for the indication of allowable subject matter: The prior art cited does not recite a structural combination of the following.
  - A light fixture, comprising: a housing; a reflector rotatably connected inside the housing; and means, operable from an external surface of the housing, for rotating the reflector relative to the housing.
